### Note:

1/ Including units unaccounted for by consumption.

2/ Maximum demand (M,W) means the largest demand for electricity measured in kilowatts (K,W) or kilo volt amperes (K,V,A) at any moment in a given period.

3/ Load Factor is the ratio of units in Kilowatt Hours (K,W,H) produced if the maximum demand had been maintained throughout the period.

Annual Load Factor = units generated or produced / (hours in the year × maximum demand) × 100
